Hello ,

I am reaching out from Google's App Partnership Team. We work with a small group of high-growth potential apps each quarter to drive new user acquisition through Ads.

In the last few years we have helped most of the top 70 iOS and Android apps grow their user base by focusing on strategies to drive higher LTV downloads.

If you'd like to further scale your user acquisition efforts and receive consultative support from Google (campaign builds, optimization, etc.), I'd be happy to set up a call to discuss (Company's) growth goals.

Let me know what your availability is like this week or next and I can send over a calendar invite.

I look forward to your reply,

--
